## February Specials

# UNDER NEW MANAGEMENT

## Is Your Car or Truck Safe?

If your brake pads wear down enough, serious damage can occur to the other parts of your brake system. When this happens, it is critical to get the problem fixed immediately. Whether a repair job or complete replacement, we will provide you with a headache free experience and the peace of mind that you are safe on the road.

### FEB SPECIALS:

*The Auto Shop has over 40 years of experience in providing Colorado with automotive maintenance and repair services. Come let our premier technicians maintain the health of your vehicle with our wide range of preventative care, inspection, and repair services. We do it all, from basic oil changes to comprehensive engine repairs. Maintaining your vehicle will save you money and a lot of stress. If something should go wrong, don't worry about it because we have you covered and will have you fixed up and on your way in no time. Set up a time to bring your car in for its next oil change and you'll see why people keep coming back every 3,000 miles!*

## Don't take chances with the Engine in your Car or Truck!

### Did You Know?

Engine Sludge is old oil resulting from excessive contamination, heat, and oil additive breakdown. Allowing it to build up can mean serious trouble. So change your oil at OEM-recommended intervals or sooner.

Your engine is comprised of many moving parts and others that don't move. When one of those components stops behaving the way it should, it can wreak havoc and even leave you stranded. We are here to make sure everything is running smoothly so your vehicle can take you to where you need to go.
